Forrest Hoglund is Chairman and CEO of SeaOne Maritime Corporation, a new company that transports liquefied, compressed natural gas. Forrest recently retired as Chairman of Forest Oil in Denver.

Forrest is the retired Chairman of the Board and CEO of EOG Resources, Inc., one of the most active drillers of gas wells in the U.S. and Canada. He came to EOG Resources in 1987 to take it public and grow it into one of the best performing independent oil and gas companies in the industry.

Prior to his appointment with EOG Resources in September 1987, Forrest was President and CEO of Texas Oil & Gas Corporation (TXO), one of the fastest growing independent producing companies at that time.

After receiving a B.S. degree in mechanical engineering from the University of Kansas, Forrest began his career with Exxon Corporation. He worked for Exxon from 1956 to 1977 in various capacities, including Vice President of Natural Gas.

He is a past Chairman of the Board of Visitors of the M.D. Anderson Cancer Foundation, a former Chairman of the Board of Trustees of the Houston Museum of Natural Science, and remains active in both institutions. Forrest also just finished chairing a successful \$653 million fund raising effort for the University of Kansas. He is also the Chairman of the Board of Reasoning Mind, a web-based math program, which is making significant changes in student's math scores. His latest effort involves leading the drive to get a new Museum of Nature & Science built in downtown Dallas.

Forrest is also Chairman and President of the Hoglund Foundation. Started in 1989, the Hoglund Foundation has provided grants to numerous educational, medical, and social needs programs in the Dallas and Houston areas.
